

## 920i Streamlines Inventory Tracking

Built around the **920i Intelligent Indicator**, the new **Tech Marine GIS** integrates multi-function scales for receiving, manual grading, packing and shipping, and a powerful software package on a PC for detailed real-time inventory tracking.

For even greater productivity, **GIS** also connects to our automated **Live Lobster Graders**.

## Modularity means...

- 1 You can start building your **GIS** with only one scale because our scales can operate both ways: traditional or reverse-weighing, at the touch of a button.
- 2 Add a PC and our inventory software, and you have a nice mini **GIS** that can track all your lobster.
- 3 And, as your budget allows, keep adding more scales, a bar code label printer, and even an automated grader, and enjoy the full **GIS** benefit.

Grading and Packing jobs are set-up in this window

Maintain a directory of **Suppliers and Customers**

Access any form or report with a **single mouse click.**

Preview or print **Detailed Reports**

The **Main Control Panel** is always displayed and shows the status of current jobs

works like this . . .

- A** Enter the required information for grading and packing jobs in the **Job Setup** window, and click the **Scales Manual Setup** button to send the information to the appropriate scales for the first job. Subsequent jobs will be sent automatically.
- B** The scale operators only have to follow the step-by-step instructions appearing on the scale display screen.
- C** All the data from the scales is recorded automatically, and is available for viewing at any time.
- D** Just select the type of report you would like, and click on the appropriate **Preview** or **Print** button.

## Reports

**Received Product by Grade:** for any particular incoming shipment

**Received Product by Supplier:** for any period, including breakdown by grade

**Packing Report by Shipment:** including product code, weight of each box, over/under weight and box count record, customer code, and date of shipment

**Packing Report by Customer:** over any period: date shipped, product code, number of boxes, weight of each box, over/under weight, and box count record

**Inventory Report:** at any time for any period, for each product or grade code: quantity added to stock (purchased), removed from stock (shipped), and remaining in stock

**Trace Report:** Full details from catch area to customer, or customer to catch area

keeps you informed . . .

**. . . with up-to-the-minute stock and production data,  
plus detailed historical records of purchases  
and shipments**

saves you time, labor, and money

### ***Some of the many benefits***

*Fast, accurate grading by direct or reverse manual weighing, or even faster with one of Tech Marine's automated graders*

*Automatic and detailed recording of all incoming and outgoing shipments, eliminating transcription errors and omissions*

*Detailed traceability from catch area or supplier to customer, or customer to catch area*

*Secure transmission of up-to-the-minute stock data to sales offices, anywhere*

*Allows supplier and customer profiling*

*Flexible, expandable architecture*

*Hardware supported by a huge network of trained service representatives*

*Unequaled **2-year** warranty*
